MINI-PROJECTS

Online Department Management System(Front End)

- Our Department Management System's aim was maintaining the information about the ENTC Department of Government College Of Engineering Yavatmal.

Automatic Drunken Drive & Drowsiness Detection System.

- Objective of our project is made to reduce no of accidents in drunken cases
- A Potential Lifesaver for detecting drunken driving and drowsiness holds immense potential in saving lives and preventing accidents

ECG Monitoring System using AD8232 sensor & Arduino

- ECG sensor obtain signals from heart beats because electrical signals are transmitted through specific pathways within the heart, causing the heartbeat. This electrical activity can be collected through electrodes placed on the skin, specifically on the front of the chest, on the arms and legs

MAJOR PROJECT

An Autonomous System For Pet Feeding and Surveillance

- The system works two mechanisms; Feeding and Surveillance.
- Cat and dog owners have long relied on simple automated pet feeders for quick business trips or weekend getaways. However, all pet owners can use to manage and improve their pets' health, especially with increasingly busy schedules

INTERNSHIPS

Internet Of Things

- Symphonics IT Services ,LPP, Ekvira Square, Darvha Road Yavatmal

Web- Development
